

Breathable Crib Liner Installation Instructions:

IMPORTANT

WARNING: To prevent climbing, remove liner when child can sit up unaided.

Periodically check hook and loop fastenings are secure and discontinue use if signs of fraying or coming loose.

Instructions for Use

1. Identify the centre of the liner and the centre slat of the short, head end of your crib.
2. With the BreathableBaby logo facing towards the OUTSIDE start to wrap one end the liner around the inside of the cot.
3. At the corner post wrap either on the inside, Figure 1, or outside, Figure 2, depending on the size and construction of your crib.
4. Wrap the other end of the liner around the corner posts and along the inside of other long side.
5. At the short, bottom end of the crib, wrap around the bottom corner's and pull the 2 sides tightly together so the liner is taut and does not sag.
6. Secure both sides together with the hook and loop fastenings, Figure 3.
7. Tuck the bottom trim of the liner down between the mattress and crib side to ensure liner is snug fit and neat.

Easy Care: For best results, close fastenings, machine wash warm, gentle cycle. Wash separately or with like colours. Only non-chlorine bleach when needed. Tumble dry low.
